

1

Once logged into ParentAccess, use the icons at the bottom-left of the screen to select the child whose report card you wish to view, if you have multiple children.

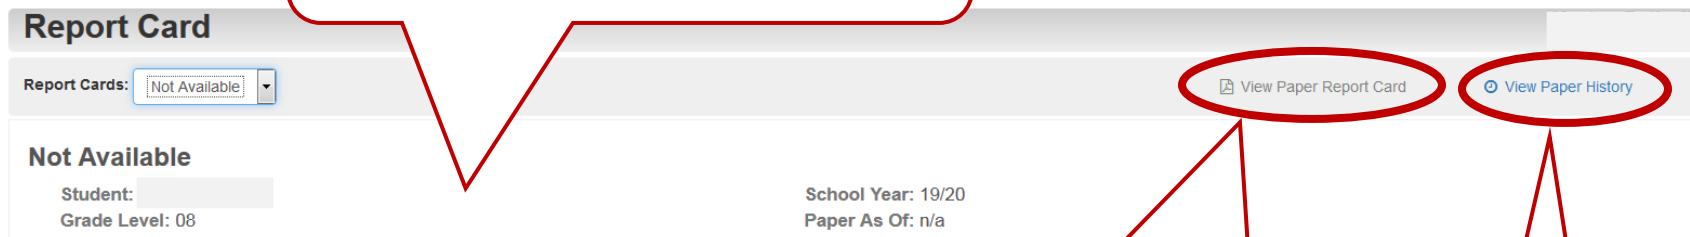

2

Then, from the menu on the left, select Report Card

3

The first screen you see is not a report card like what you've received in paper form in the past. Here, you'll see a list of your child's current report card grades (once they are posted by the school).

No report card information is available at this time.

To see the actual report card like what used to be given to the students in paper form, click the 'View Paper Report Card' link. This will create the report card in PDF form, which can be printed if you would like a paper copy.

To see previous year's report cards, click the 'View Paper History' link.
